Experience

Aizen Technosoft

Aug. 2025 – April. 2026

Fullstack web dev intern ([@ashutosh](#))

Bangalore

- Worked on **Multi-Tenant SaaS Project Management System**
- Architected a multi-tenant SaaS project management platform supporting workspace isolation, role-based permissions, and real-time collaboration.
- **Tech Stack:** [React](#) [NodeJS](#) [Redis](#) [Docker](#) [PostgreSQL](#)

PROJECTS

AI Code Review Assistant

- Architected a full-stack AI-assisted code review application capable of analyzing source code and providing automated bug detection, performance improvements, and best-practice recommendations. **100% success rate**
- Integrated enterprise-grade code editing features using **Monaco Editor** and connected multiple LLM providers through configurable API endpoints.
- Enhanced developer productivity by **automating manual code** review workflows through AI-driven static analysis and code intelligence. [Deployed](#)

Ai code Generator

- Developed a metadata-driven backend runtime that dynamically generates APIs, validation logic, workflows, authentication-aware CRUD operations, and frontend forms from declarative JSON schemas.
- user describes what it wants to build and with the help of that metadata we build that project
- Tech Stack: Node.js, TypeScript, Express [Github](#)

Data Processing and ETL Pipeline platform

- Designed and implemented an automated ETL pipeline to ingest, transform, validate, and load structured data from multiple external sources into a centralized database.
- Developed scalable data extraction modules capable of processing CSV, JSON, and API-based datasets.
- Engineered transformation workflows for data cleansing, normalization, deduplication, and schema validation, improving overall data quality.
- Built asynchronous processing jobs and task queues to handle **100MB** datasets efficiently.
- Optimized database insertion strategies and indexing techniques, significantly reducing data ingestion time. [GitHub](#)

EDUCATION

NIST University

Nov.2022 – Nov 2026

Bachelor of Science and Technology

Berhampur, Odisha

- **Coursework:** Data Structures, Algorithms, Databases, Computer Systems, System Design, OOPS
- **Interpersonal Skills:** Team member of Arts and Dramatic Club, and also NIST Robotics Club

SKILLS

Languages : Python, JavaScript (Express.js), HTML/CSS, NoSQL (MongoDB) PostgreSQL, React.js

Tools : Figma, Notion, GitHub
