Experience

Aizen Technosoft

Aug. 2025 – April. 2026

Fullstack web dev intern (@ashutosh)

Bangalore

- Worked on **Multi-Tenant SaaS Project Management System**
- Architected a multi-tenant SaaS project management platform supporting workspace isolation, role-based permissions, and real-time collaboration.
- **Partnered with brands like Skillshare and Squarespace** to expand their outreach via sponsorships
- **Tech Stack:** [React](#) [NodeJS](#) [Redis](#) [Docker](#) [PostgreSQL](#)

Finesses Tech

May, 2026 – Present

Software Engineering Intern

- Built a back-end database service in **Javascript** and implemented a front-end UI to support future changes
- Working as a tech developer with backend team and handling projects

PROJECTS

AI Code Review Assistant

- Architected a full-stack AI-assisted code review application capable of analyzing source code and providing automated bug detection, performance improvements, and best-practice recommendations. **100% success rate**
- Integrated enterprise-grade code editing features using **Monaco Editor** and connected multiple LLM providers through configurable API endpoints.
- Enhanced developer productivity by **automating manual code** review workflows through AI-driven static analysis and code intelligence. [Deployed](#)

Chess

- Architected a full-stack multiplayer gaming system supporting concurrent player sessions through **Socket.io - bidirectional communication**.
- Designed an event-driven backend using Express.js to manage game **state transitions**, matchmaking workflows, and leaderboard calculations.
- Implemented secure authentication, rate limiting, and server-side validation to prevent unauthorized actions and score manipulation.
- Tech Stack: Node.js, Socket.io, Chess.js, CSS, Tailwind CSS, EJS [Github](#)

Data Processing and ETL Pipeline platform

- Designed and implemented an automated ETL pipeline to ingest, transform, validate, and load structured data from multiple external sources into a centralized database.
- Developed scalable data extraction modules capable of processing CSV, JSON, and API-based datasets.
- Engineered transformation workflows for data cleansing, normalization, deduplication, and schema validation, improving overall data quality.
- Built asynchronous processing jobs and task queues to handle **100MB** datasets efficiently.
- Optimized database insertion strategies and indexing techniques, significantly reducing data ingestion time. [GitHub](#)

EDUCATION

NIST University

Nov.2022 – Nov 2026

Bachelor of Science and Technogy

Berhampur, Odisha

- **Coursework:** Data Structures, Algorithms, Databases, Computer Systems, System Design, OOPS, Machine Learning
- **Interpersonal Skills:** Team member of Arts and Dramatic Club, and also NIST Robotics Club

SKILLS

Languages : Python, JavaScript (Express.js), HTML/CSS, NoSQL (MongoDB) PostgreSQL, React.js

Tools : Figma, Notion, Jira, Trello, Miro, Google Analytics, GitHub, DaVinci Resolve, OBS
