SUMMARY

Frontend and Backend Engineer with hands-on experience in Development and Machine Learning, NLP (Natural Language Processing), and real-time data pipelines. Experienced in building Backend API services, integrating ML models into applications, and developing analytics-ready data processing solutions with working knowledge of MLOps fundamentals.

TECHNICAL SKILLS

Programming Languages: Python, C++, SQL, MATLAB

Deep Learning Frameworks: TensorFlow, PyTorch, Keras

Libraries & Tools: NumPy, Pandas, Scikit-learn, OpenCV, NLTK, Git, Docker

PROJECTS

VulnerabilityFinder

- Developed a VS Code extension using JavaScript and the VS Code Extension API that identifies vulnerabilities in code.
- Displays detected bugs using the VS Code Diagnostic format.
- Shows a summary message such as “Found X Issues” after scanning. [GitHub Repository](#)

planeGame

- Developed a nostalgic 90's style airplane shooting game using HTML, CSS, and JavaScript.
- Implemented keyboard controls using Arrow Keys for player movement. [GitHub Repository](#)

Geolocation Weather App

- Developed a website that lets you click anywhere within the map.
- It then fetches the current temperature, humidity and condition of the sky here. [GitHub Repository](#)

EXPERIENCE

ML Developer Intern

May 2025 – November 2025

Finesse Fleet Foundation

- Implemented and evaluated transformer-based LLMs (lightweight to large-scale Hugging Face models) for code-mixed Indian language translation as part of Lingual Bridge.
- Built multilingual translation pipelines supporting 22+ Indian languages using Hugging Face Transformers, tokenizers, and Indic NLP tools.
- Integrated sentiment analysis using NLTK, TextBlob, and VADER.

AI / ML Intern

Jan 2021 – May 2022

Central Tool Room and Training Center (MSME)

- Developed a real-time face recognition and attendance system using Python, OpenCV, dlib, and face-recognition libraries.
- Implemented HOG- and CNN-based face detection with 128-dimensional face embeddings using a pre-trained ResNet-based model.
- Collaborated with cross-functional teams to deliver AI-based solutions.

EDUCATION

NIST Institute of Science and Technology

B.Tech in Computer Science and Artificial Intelligence

Berhampur, Odisha

November 2023 – April 2026
