

Ashutosh Das

+91-8917435013 — ashutoshdasmail276@gmail.com — GitHub — LinkedIn — Portfolio

Professional Summary

Full Stack Developer with internship experience building scalable SaaS applications and AI-powered developer tools. Experienced in designing REST APIs, multi-tenant architectures, authentication systems, ETL pipelines, and AI integrations using modern web technologies. Passionate about backend engineering, system design, developer tools, and building production-ready applications.

Technical Skills

Languages: JavaScript, TypeScript, Python, HTML5, CSS3

Frontend: React.js, Electron.js, Tailwind CSS, Monaco Editor

Backend: Node.js, Express.js, REST APIs, JWT Authentication, RBAC

Databases: PostgreSQL, MongoDB, Redis

DevOps & Tools: Docker, Git, GitHub, Postman, Figma, Notion

AI & Systems: LLM Integration, Ollama, MCP, WebRTC, WebSockets, ETL Pipelines, Async Processing, Multi-Tenant SaaS Architecture, System Design

Experience

Full Stack Developer Intern

Aug 2025 – Apr 2026

Aizen Technosoft

Bangalore, India

- Developed features for a multi-tenant SaaS Project Management platform using React, Node.js, PostgreSQL, Redis, and Docker.
- Implemented workspace isolation, Role-Based Access Control (RBAC), authentication workflows, and scalable backend APIs.
- Collaborated with senior developers to build production-ready features while following Agile development practices.
- Improved application scalability through efficient backend architecture and optimized database interactions.

Projects

AI Code Review Assistant

GitHub — Live Demo

- Built a full-stack AI-powered code review platform capable of detecting bugs, suggesting optimizations, and enforcing coding best practices.
- Integrated Monaco Editor to provide an IDE-like code editing experience with syntax highlighting and intelligent editing features.
- Connected multiple LLM providers through configurable API endpoints, enabling flexible AI model selection.
- Automated code review workflows, improving developer productivity and reducing manual review effort.

App Generator - Metadata

GitHub

- Designed and developed a metadata-driven application generation platform that creates backend APIs, frontend forms, database models, validation logic, and authentication workflows from declarative JSON schemas.
- Built dynamic CRUD generation, routing, middleware, and workflow engines using Node.js and TypeScript to significantly reduce repetitive development effort.
- Implemented schema validation, reusable templates, and modular architecture to support rapid application development.
- Tech Stack:** Node.js, TypeScript, Express.js, PostgreSQL, JSON Schema

Data Processing & ETL Pipeline Platform

GitHub

- Designed and implemented an automated ETL platform capable of ingesting CSV, JSON, and API-based datasets into centralized databases.
- Developed scalable data extraction modules with validation, normalization, deduplication, schema verification, and asynchronous processing pipelines.
- Optimized batch database insertion strategies and indexing techniques to improve large dataset ingestion performance.
- Supported processing of datasets up to 100 MB using asynchronous job execution.
- Tech Stack:** Node.js, PostgreSQL, Express.js, BullMQ, Docker

Education

NIST University

2022 – 2026

Bachelor of Science and Technology

Berhampur, Odisha

Relevant Coursework: Data Structures, Algorithms, Database Management Systems, Operating Systems, Computer Networks, Object-Oriented Programming, System Design.

Certifications

- Deloitte Technology Virtual Experience [link](#)
- Cyber Security Certification [link](#)
- Selenium WebDriver Certification [link](#)

Leadership & Activities

- Member, NIST Robotics Club
- Member, Arts and Dramatic Club
- Write technical blogs on Full Stack Development, Artificial Intelligence, Backend Engineering, and Software Development.

Core Competencies

- Full Stack Development
- Backend Engineering
- REST API Development
- AI-powered Developer Tools
- Multi-Tenant SaaS Architecture
- Authentication & Authorization
- Database Design
- System Design
- Problem Solving & Data Structures
